Trekking through the **Mrtvica canyon** makes an unforgettable experience, due to variety of fascinating nature all around. Mrtvica canyon is one of the most beautiful canyons in Montenegro. The trekking trail leads along the river, through amazing and gorgeous natural surroundings, with fabulous views on the turquois water, relaxingly fresh rapids flowing over the river stones, green forest and high steep cliffs. Somewhere in the middle is unique **Gate of Wishes**, naturally created by two rocks meeting each other and firming a bridge. The most fascinating part is also the **beam tunnel** carved into the cliff by Yugoslav Army back in 1970-ies,

Visit of the **mountain cottage village Eco katun**, rustic wooden chalets spread on the top of Bjelasica mountain on 1800m above the sea level. In pure natural ambience you can taste the local eco products grown on this very farm. Corn meals, home made sour milk, home made bread, local leaf cheese, and similar. Enjoy the fabulous ambience and see the traditional way of life in mountain part of Montenegro.

- The tour is suitable both for individuals and small groups
- It includes transport and guide throughout the program
- Accommodation can be provided according to the group preferences (hotels 3 to 4 stars, eco villages or combination of different types)
