Green Events

- Green Events are events which prioritise **social, environmental** or **economic sustainability aspects**.
- Even though a certain amount of basic rethinking and restructuring is necessary in advance, **you profit** in many ways as the event organiser.
- A booking portal adapted to your **individual specifications**, with a list of our green locations.

Hybrid Events

- Unlike classic video conferences or live streams, hybrid conference formats are more technically demanding.
- In addition to special participant software, use is also made of **high quality image, sound and camera technology**. The seating is customised for the visitors, and a **professional studio** with a stage and LED walls or screens is set up for the **live transmission**.
- The **Hannover Congress and Events Office** has already taken these special demands into consideration for your event, and you can easily find your hybrid location via our **booking portal**.
