Lexi™

PERFECT FOR: Pre-recorded broadcast | Events | Production | Meetings

Lexi™ is Ai-Media's leading automated captioning solution.

It's a low-touch, cloud-hosted solution that uses its cutting-edge machine learning technology to achieve greater accuracy than 'out-of-the-box' automated captions. It is available at our lowest price point for captioning.

Lexi provides best-in-class accuracy while focusing on vocabulary, positioning and automation.

- **Budget-friendly**
- **Better accuracy than out-of-the-box automatic solutions**
- **Self-managed, easy to set up**
- **Fastest caption display times**
- **Set up your own topic models for custom vocabulary and pronunciation input**
- **Highly scalable**
- **Suitable for high-quality audio streams and live broadcast**
- **24/7 global availability**
- **Lexi Local™ also available: On-premises solution for increased data security**
- **Can be accessed from any Ai-Media or EEG encoder**
- **Can be used with iCap Translate to translate to and from many languages**
