The imprint of Indochine in the coastal city

Potique

A note of time

Following Dr. Alexandre Yersin who first discovered and devoted all his life to Nha Trang from the late 19th century, to the early 20th century, the influences from classical French culture combined with the rustic and liberal nature of Asia has created a sophisticated Indochine style. It is also an endless source of inspiration for Potique to tell an own story – the story begins in the name of the hotel itself, cleverly integrated by poetic elements (Poem) and subtle artistic qualities (Boutique). All being sequentially conveyed completely through each architectural line, affirming the cultural identity and historical landmarks of Nha Trang.
