04

API Integration

How does it work?

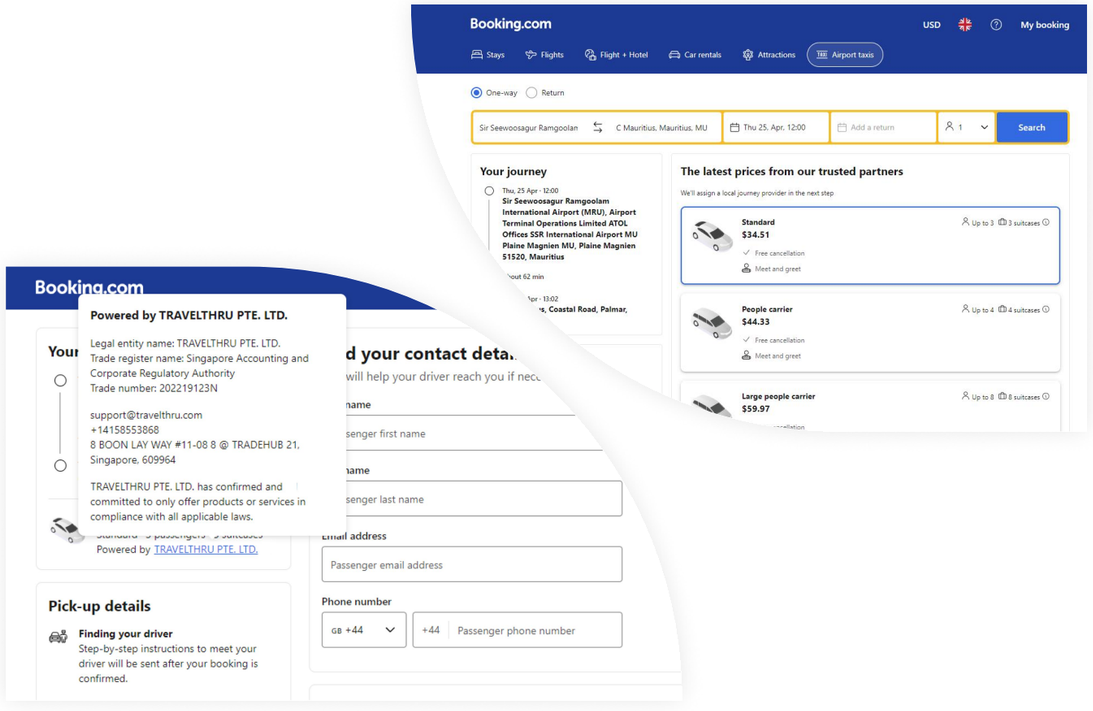

When integrated into a partner's portal or B2C website, TravelThru's API unlocks numerous possibilities. B2B users (agents) can log in to book TravelThru products and offerings from other companies like hotels and tours. Partners can offer a user dashboard for seamless booking manager and may charge a fee. With customizable features and commission distribution, TravelThru's API empowers partners to create personalized travel platforms, simplifying the booking process for customers.

Get our exclusive API?

- Our API supports B2B and B2C needs, customizable to your brand and displayed in local currency on your website.
- The API is designed to function alongside APIs from different vendors and can be smoothly integrated into your B2B portal infrastructure.
- Partnering with us gives you access to TravelThru's full suite of features, including journey searches, booking engine, and real-time driver tracking, enhancing your business operations.

Benefits

- Seamless integration into your website or contact center
- Easy look and feel integration
- Independent API platform
- API compatibility with both B2B and B2C
- Access to the sandbox environment for testing
- Scalable integration to meet your needs
- Very high availability platform for reliability
- Seamless integration testing with API shooter
- Platform and dedicated support team for assistance
- You are responsible for payment

05

Affiliation

How does it work?

Affiliate marketing is an arrangement in which an advertiser or merchant, such as TravelThru, pays a commission to a publisher or affiliate, like you, for sales generated from referrals to its website.

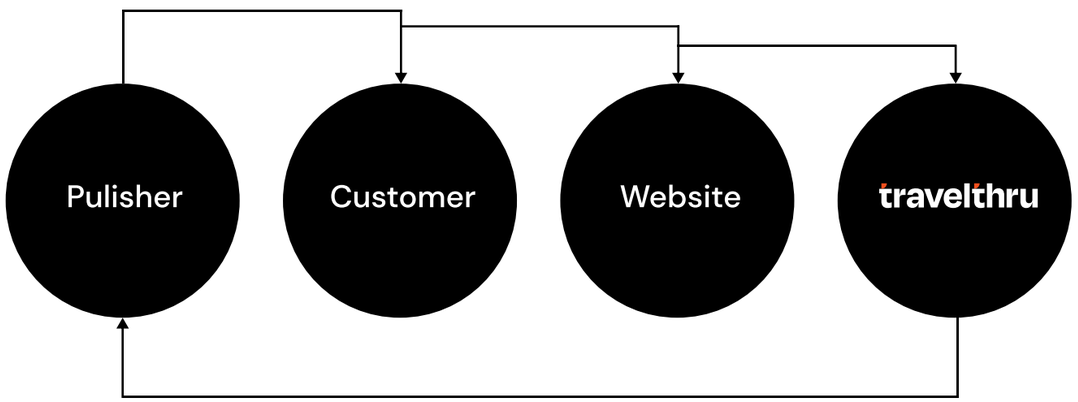

Table of comparison

Compare the offers from a technical standpoint.

	API	Widget	White label	Client Portal	Affiliation
