Audience Response

The use of live, interactive response systems, with the results displayed in real time, is proven to increase audience participation as well as knowledge retention and thereby enhance the overall experience for those attending.

Automated Cameras

By adding an automated camera system to your conference, with each microphone position preset, you ensure that immediate relay to conference screens of every speaker, no matter where in the room they are located, is achievable.

Electronic Name Signs

Further enhance your event with the use of Electronic Name Signs. These allow for the identification of attendees in a professional and effective manner with even frequent alterations to seating positions easily handled.

Tour Guide Systems

In certain instances traditional simultaneous interpretation systems are simply not viable. Designed for factory visits, bus tours, museum visits and so on, Tour Guide Systems can also be utilised to allow interpreters to provide their services with added mobility.
