SIMUL EUROPE

E-Posters System

SIMUL E-Posters system is an interactive display poster based on large screen and a tablet, designed for all users within medical or corporate event. Our system enables a variety of possibilities for the user and revolutionizes completely the whole concept of the posters presentation.

https://www.simuleurope.org/e-posters

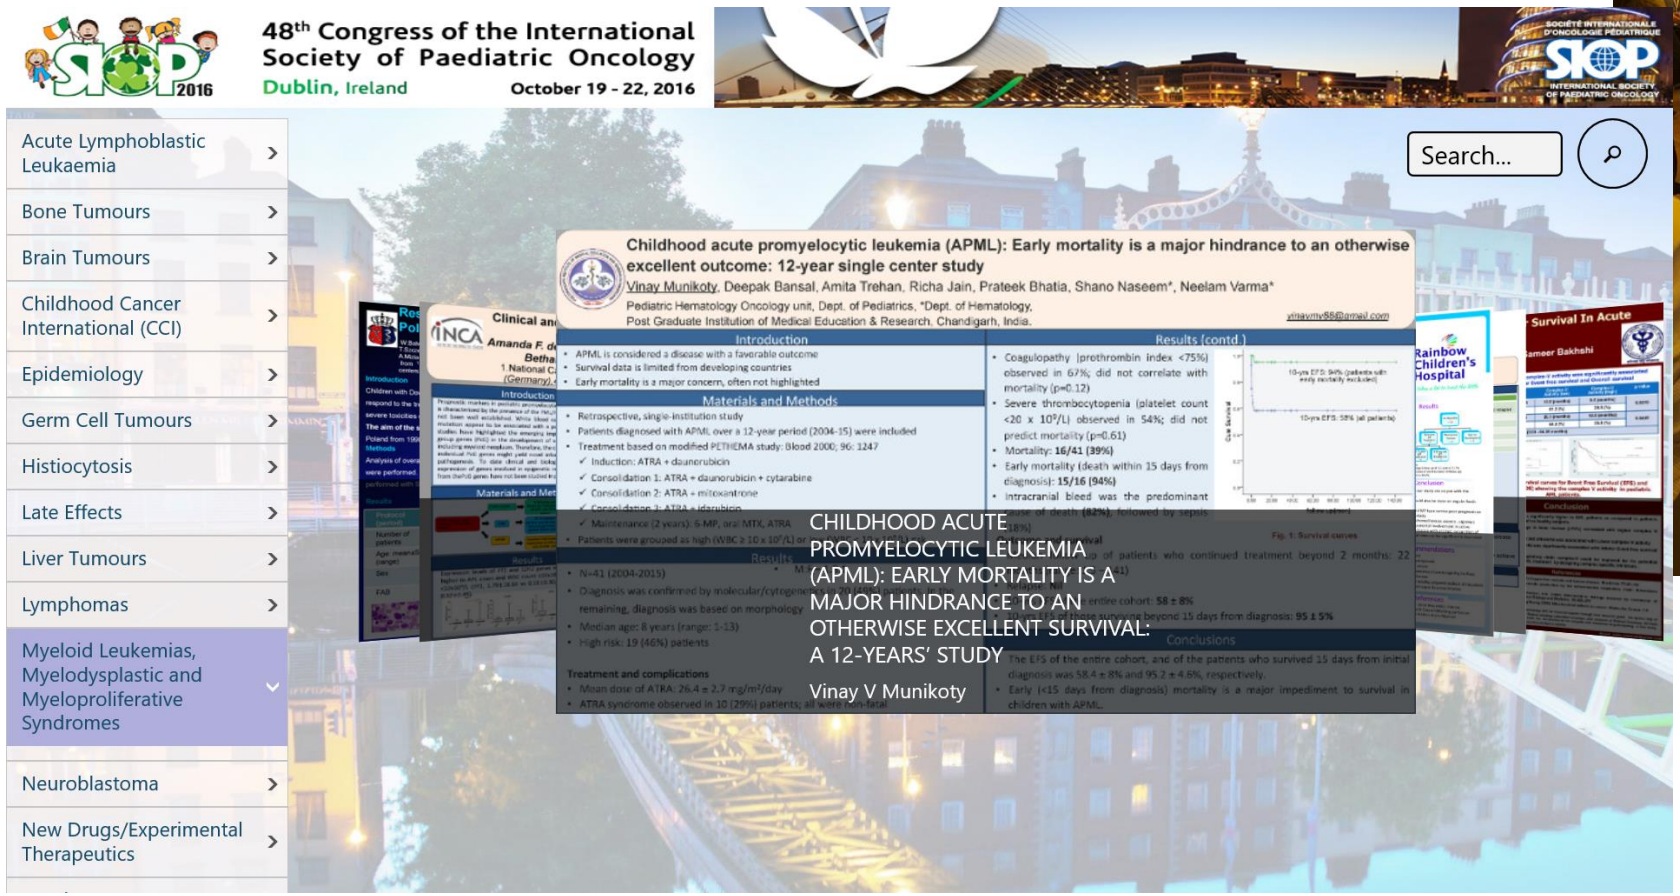

SIMUL EUROPE

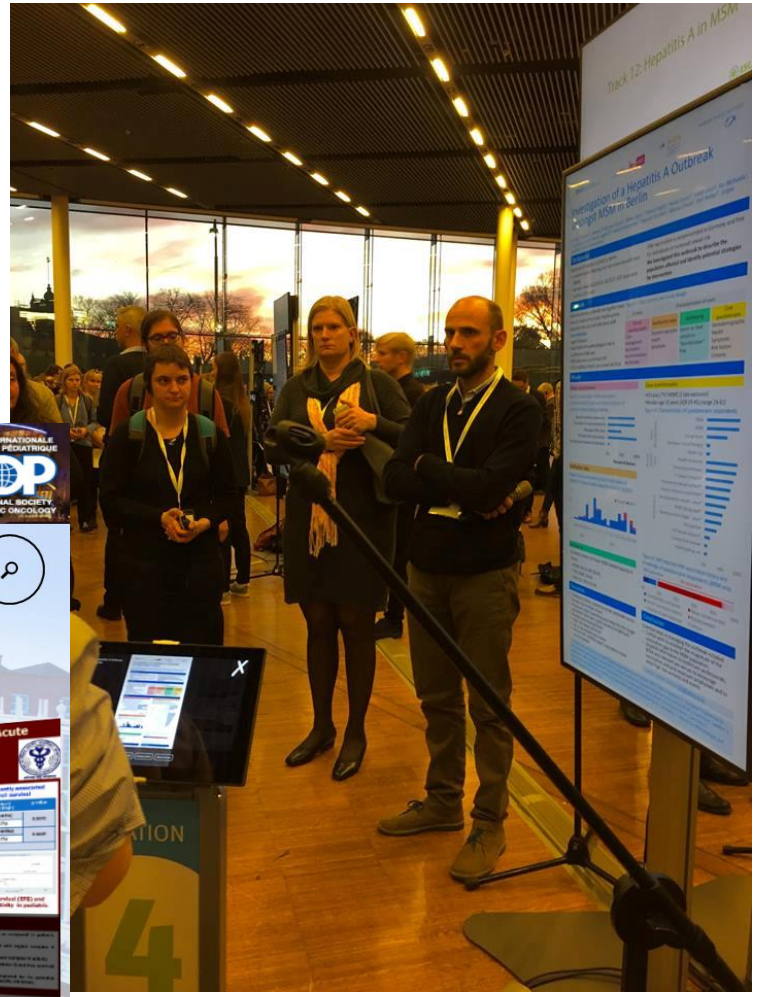

E-Posters System

Features at a glance :

- Central view of all posters searchable over a touch tablet stand
- Web based poster submission upload system
- Delegates can send poster via mail
- Delegates can send message to the authors
- Delegates can vote for their selected posters
- Web based online mode to present the posters on the website
- Exhibition mode runs as automatic screen saver
- Listen to the authors sound review while viewing the poster
- Automatic download of the poster via QR code

SIMUL EUROPE

SIMUL EUROPE

Digital Information System

Digital information system is a unique sign technology for publishing the congress content on monitor screens in the open area. Or at the entrance of the halls.

Features at a glance:

- Flexible monitor size from 32"-75" to present the selected details .
- Control the screens in a group or each one separately .
- Control each group or section inside the screen from a different controllers .
- Set an automatic timing for every scenario.

SIMUL EUROPE

Digital Information System

Following details can be shown on the screen:

- Streaming from halls.
- Detail about the present speaker and the next one.
- Timetable of the event or selected hall.
- Background.
- Logos.
- Videos.
- Banners.
- Online info like news, weather , websites, twitter and much more .

Methodology

Study Design	A prospective randomised double blind study
Study setting	Justice KS Hegde Hospital,Deralakatte,Mangalore,India
Study period	January 2016 to August 2017
Study Population	Paediatric Patients undergoing lower abdominal surgeries satisfying the inclusion criteria
Sample size	31 each in TAP group and Caudal group

Nikhil Maruthi Pallath
India

COMPARISON BETWEEN ULTRASOUND GUIDED TRANSVERSUS ABDOMINIS PLANE BLOCK AND CAUDAL BLOCK FOR POSTOPERATIVE ANALGESIA IN CHILDREN UNDERGOING LOWER ABDOMINAL SURGERIES - A PROSPECTIVE RANDOMISED STUDY

Time Elapsed 03:50 TIme Remaining 05:10

15:30 MY PATIENT IS 38 WEEKS PREGNANT, HAS 30.000 PLATELETS AND
16:20 REQUIRES LABOUR ANALGESIA

Audience Response Systems

Our Audience Response Systems is an interactive tool to engage participants socially inside the halls.

It gives the audience the opportunity to:

- Communicate with the speaker on stage or the chairman in the hall in real-time for the Q&A during or at the end of the lecture.
- Send a question to the attendees spontaneously and in case of voting or Q&A see the result on the screen.

SIMUL EUROPE

Audience Response Systems

No plans need to be made in advance !

It can be done by scanning the barcode to ask questions or by voting on existing questions.

It is as simple as scanning the QR code that will be on the screen during or after each lecture or session and then type your answer or participate in a voting question.

SIMUL EUROPE

Webcasting

The Simul webcast provide the end-to-end webcast and recording service that allows your event to be shared publicly or privately and save your knowledge from your successful event .

Features at a glance:

- Capture from screens or cameras at Full HD resolution
- Capture presentation camera, slides and voice simultaneously
- Archive or live broadcast the stream
- Multi language streaming allowing live dubbing to the streaming

Speaker Management System

The speaker management system is a set of tools allowing us to control the presentation from delivery till the end of the lecture.

Features at a glance :

- Online speaker portal to upload and modify the presentation up to one day before the lecture.
- Fast tracking system of speakers inside the speaker's ready room that tracks the presentation, check it and send it to the correct hall on the network.
- Big screens to show the status of presentation delivery of all next presentations.

SIMUL EUROPE

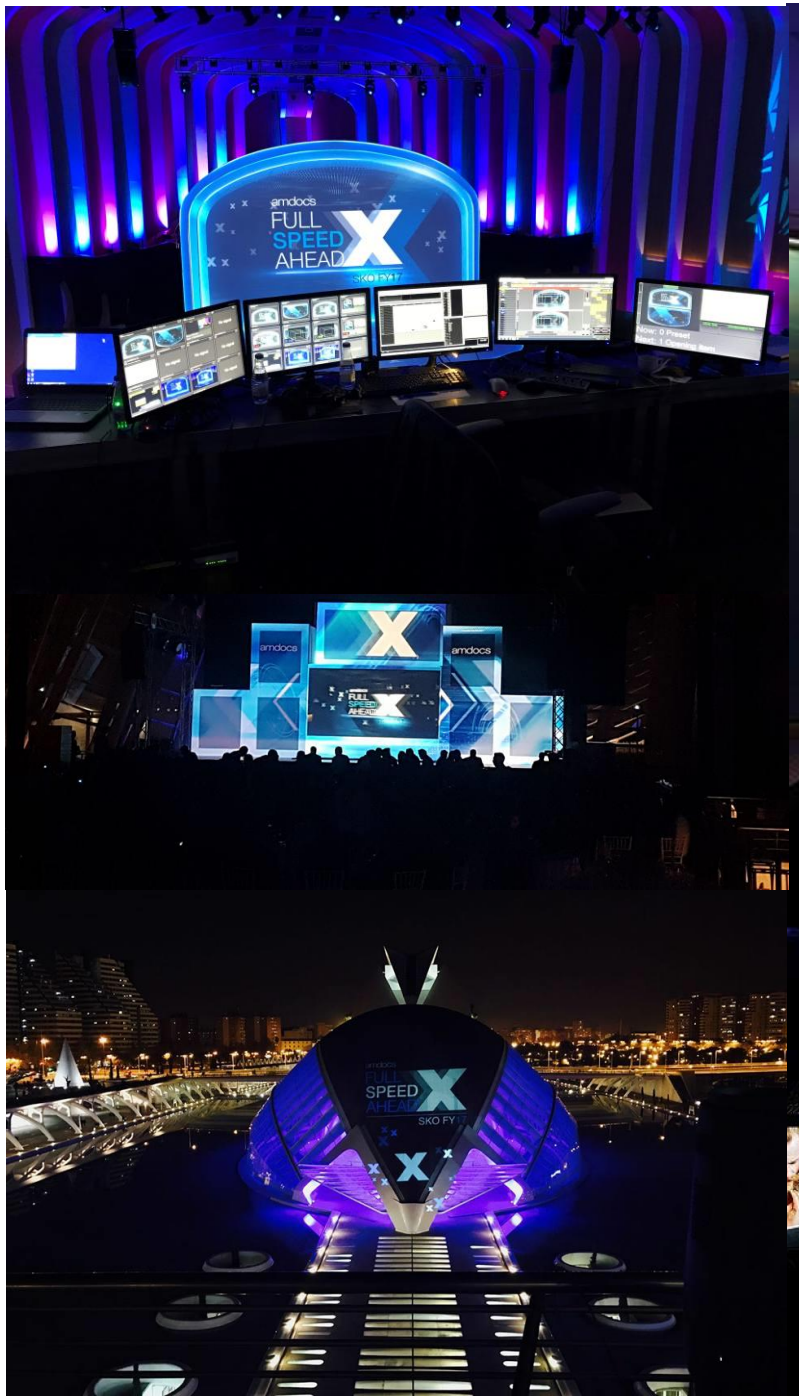

Speaker Management System

- The system enable us to know which presentations are delivered, which are missing, who is lecturing at the moment and who has finished.
- There is the possibility to send alerts to the organizers or directly to the speakers if a presentation is missing a short time before the session starts.
- A platform inside the hall allowing in one click to open the presentation, the name and title of the current speaker on the monitor below and open the timer with the time given to him.
- It will also generate a unique QR code for the speaker in case a voting or a Q&A will be needed.
- Send all relevant information to the information system .
