THE COUNTRY CALLED BELARUS

Belarus is an amazing country and a gold mine for those who like travelling, getting new impressions, taking fantastic pictures or who are just looking for comprehensive recreation and activities. A great number of historical, cultural and natural monuments are concentrated on the relatively small territory of the country located at the very East of Europe. Here, on the outskirts of the vast terrains of European plain you will meet warm and hospitable people - the nation which calls itself the Belarusians. Favorable climate, attractive natural landscapes and rich historical heritage allow to explore the country all year round and enjoy all kinds of amusements and recreation

NATURAL WEALTH

The quiet charm of Belarusian natural landscapes which are not characterized by bright colors fascinates country's guests at the very first sight. The dense green carpet of its beautiful land, which is often called the "blue-eyed", is richly decorated with more than 11 thousand lakes and 20 thousand small rivers integrated in the unique system of marshlands. You will breath sweetly and deeply because more than 40% of the country's territory is occupied by coniferous and mixed forests. Huge spaces of primeval forest also form the landscape of the famous National Park Belovezhskaya Pushcha (UNESCO list) which gives shelter to a large number of rare plants and animals among which is the true symbol of Belarus - the European bison.

ARCHITECTURAL HIGHLIGHTS

Modern sophisticated urban masterpieces, Stalinist empire sober buildings, ancient churches, monasteries and castles, two of which are included in the UNESCO world heritage list (Mir and Nesvizh) - all these are part of the historical legacy of old and new Belarus. Many cities including Minsk, Turov and Polotsk served as military strongholds at strategic routes in Middle Ages, in particular, at the legendary way “from the Vikings to the Greeks”. The connoisseurs of antiquity can enjoy medieval architecture surrounded by primeval rural landscapes and park ensembles of the Renaissance epoch. Brilliant noble families - the Radziwills, the Sapiegs and many others left behind a magnificent architectural legacy which survived in old towns like Mir, Nesvizh and Slonim. An incredibly large number of public gardens make every Belarusian city green, cozy and comfortable for travelers.

NATIONAL TRADITIONS

Contemporary Belarusian culture and traditions are very rich and diverse, reflecting nation's location at the crossing point of European roads and the country's great and turbulent history. This rich and tumultuous past greatly influenced the character of modern Belarusians who, according to general opinion, are calm tempered, hospitable and reasonable persons. From ancient times Belarusians deeply respect their indigenous ancestry - there is even a special day off for traditional ancestors' rites that has been preserved among the Slavic nations only at Belarusian territory. They are also good in making merry - it's just enough to watch bright folk national holidays like Kupala bonfire festival. The unique exhibits of folk crafts can be found everywhere in multiple tourist attractions, which tell you about the history, culture and way of life of Belarusian people.

BELARUSIAN CUISINE

Belarusian cuisine is packed with gourmet bites and delicious dishes made from natural organic products. An unusual combination of fairly simple and familiar ingredients makes the Belarusian cuisine very special. It has incorporated long cooking traditions both of the West and East European cuisines. You will definitely enjoy famous pancakes made from potato that is often called in Belarus “a second bread”, juicy home sausages with mushrooms in sour cream sauce and strong tincture on honey and herbs called Cram-bam-bula. And be sure to try traditional deserts including cranberries in sparkling sugar crust, sweet rolled pancakes with natural birch juice or mead.
