WHY FINLAND?

Finland was recently named as one of the top travel destinations to visit in 2017 by National Geographic and also ranked as a third best travel country by Lonely Planet.

Finland is a perfect location for first-class international conferences and corporate events. Helsinki is a flight hub with over 200 international flights arriving daily, and a central link between Asia, Europe and North America.

Finns are reliable partners and easy to work with: our reputation as punctual and efficient is true.

Finland is environmentally responsible: we are committed to recycling and always consider ecological viewpoints. We value our green and clean environment.
