About Laurent Dalençon

With an experience of **15 years as an international freelance photographer**, Laurent focuses on people, emotions and sensations, trying to capture not only a scene, but a message, a look, an event, a story, the sensory perspective that pulses behind the image. And this is also very relevant in the world of communication where the identification of the final customer matters a lot to the message or product philosophy.

He collaborates with several agencies in Seville, Madrid and France to cover events and reports nationally and internationally. **Laurent is trilingual French, English and Spanish.** Currently learning Italian.
