Amadeus API Integration - Flights, Hotels and Cars API Integration

- Travelopro is a leading Travel Portal Development Company globally. We build travel websites that are integrated into Travelopro's online booking engine and back office which enables centralized tracking of all reservations.
- The reservation portal allows your staff to block/release rooms on guest requests, modify reservations, update reservation advances and other booking-related activities.

How To Integrate Amadeus API with Your Travel Website?

- From responsive B2B reservation portal, your authorized agents can logon to your B2B portal, search and book products, add mark-up and pay for booking online.
- Tour & travel have always been popular whether for business or for enjoyment. Through our Travel API the travel agents can use our web application to fulfill the travel related needs of their customers.
- By integrating this travel API with your own software solution, you as a travel service provider, can offer unbeatable travel related services to your potential clients.
- Through our B2B booking engine, travel products can be sold across the globe through sub-agent network and increase sales of business.

- Our major B2B booking engines such as Hotel, Tour, Package, and Visa built with all essential tools that enables you to upload your own contracted products, integrate third-party suppliers, adjust pricing and markup at runtime, generate agent wise reports, map banners, incorporate business rules and easily take insight into business sales.
- Our end to end travel management technology solution enables you to offer unbeatable travel related services to your potential clients. We offer you unproblematic base in the form of faultless travel related services which you can use to develop a strong customer segment for yourself.

Features of Online Reservation System:

- Fast and Flexible booking engine
- Secure, scalable and robust reservation architecture
- Fully customized booking engine
- Cost-effective solutions
- User friendly interface
- Integrated Payment Gateway
- Multi-language support
