Lake Manyara National Park

Accommodation

Gran Melia Arusha

Strung out in the shadow of the Rift Valley escarpment, that great fracture in the earth's surface that divides Africa in two, Lake Manyara is one of Tanzania's more unusual parks. Here you'll certainly see the elephants for which the park is famous, and, if you're really lucky, one of the park's equally well-known tree-climbing lions. There's also a lake filled with wading birds, plenty of olive baboons, and dense forests that make you feel that exciting animals could emerge from the trees at any moment. It's a wonderful chance to mark the transition between the lower plains and the Crater Highlands (with Ngorongoro Crater) away to the west.

Treetop walk, Lake Manyara National Park

Walk high in the treetops of Lake Manyara National Park along this elevated 370m-long boardwalk (with suspension bridges) through the canopy. It's a wonderful change in perspective and you'll get to see plenty of birds. Keep an eye out for lions in the trees.
