Lake Manyara National Park, Tanzania

Day 2

After a tasty breakfast get ready to explore one of the smaller but most scenic park – Lake Manyara National Park. Lake Manyara National Park is a popular destination because of its breathtaking scenery, the enormous soda lake full of flamingos and outstanding bird life. You can see huge troops of baboons roaming around in the forest, but also herds of elephants and if you are lucky even some tree-climbing lions.

Lake Manyara is also a perfect place to see the spectacular 400 meter high Rift Valley Escarpment. The Great Rift Valley is a long rift in the earth which runs down the eastern side of Africa. This enormous feature is even visible from outer space and looks like two lines running down Africa. It provides unique and diverse habitats. Enjoy acacia woodland, jungle forest, mountain cliffs, hot springs, grassy areas, acacia woodland and the huge soda lake.

The shallow Hippo Pool offers excellent opportunities for hippo sightings and you will have a spectacular view of the Rift Valley Escarpment. Lake Manyara is an ideal location to combine game drives with enjoyable activities, like a cultural tour, mountainbike tour or canopy walk.

Day 4

Today you enjoy a full day game drive at Serengeti National Park. With the help of your private driver guide, you will decide your schedule as you wish.

Remember that the flexibility of having your private guide and private vehicle during a safari shows itself when you want to spend more time following a particular animal in its natural, undisturbed habitat, or when you want to lazy around a bit as you wait for the sun to engulf the horizon with its violet and fire colors, or experience a venture into a sunrise game drive to catch the colors of a waking game reserve with freshly made coffee and an endless horizon. Your private guide will tailor the experience to accommodate your major interest and passion for the day.

Ngorongoro Crater, Tanzania

Day 5

Waking up with the sounds of the Serengeti plains is a privilege we really enjoy. After breakfast, sit back and enjoy the game drive en route: from Serengeti, the road winds over the crater rim and ending at your final destination: the striking Ngorongoro Crater.

Two to three million years ago the large volcano exploded and collapsed on itself. As a result the crater formed which then created a unique ecosystem with a wide variety of vegetation.
