Arrival

On arrival at Kilimanjaro International Airport and after border formalities, you will be welcomed by our guide, who will transfer you to a hotel/lodge in Arusha town (HB).
On your way to Arusha town, you will be welcomed by great views of the Mount Kilimanjaro *(when sky is clear)*, the highest summit in Africa covering 5895m and the second highest Mount Meru covering 4563m above sea level. You will encounter different ways of living practiced by locals and plenty of banana and coffee farms. Your tour is as good as started in this first day.

Day 1: Tarangire National Park

You will be picked from your hotel at 8am and drive alongside the great rift valley to the iconic Tarangire National Park for a full day game drive. Your day ends **at Lodge/tented lodge** where you will retreat for overnight.

Tarangire is a breath-taking and fascinating wildlife destination, you will only realize how beautiful the park is once you get in. With high encounter of big herds of elephant (bigger than anywhere else in the northern parks of Tanzania), biggest baobab trees, thousands of wildebeests and zebras as they turn from their calving grounds of Lokisale and Simanjiro plains bringing calves home to get permanent water from Tarangire river and other sources like Silalei swamps and prominent ponds. Tarangire is endowed with such a good habitat and vegetation giving it a good cover enough to offer 4 out of big five namely Lions, Leopards, Buffalo and Elephants. Tarangire is unique in many ways but frequency of witnessing lions on trees is second to Manyara National Park. For birdlife lovers, this is home of birds, get stunned with high concentration and diverse bird species here.

Day 2: Ngorongoro Crater

We suggest a very early wake up on this day with early breakfast before departing to Ngorongoro Conservation Area for game drive in the crater. You will do a short game drive until lunch time with packed hot lunch at Ngoitoktok public picnic site. After lunch continue with game drive before exiting the crater to Arusha town or Airport for departure.

Ngorongoro Crater is the world's most famous and biggest caldera. The caldera has a 19km of diameter and 260km of circumference offering one of the largest concentrations of wildlife due to availability of water and food almost all the year round. The crater has a river, several swamps, a soda lake with a great concentration of flamingos, a forest and open plains. Gorigor and Mwanduzi swamps are home to oldest male elephants with the longest tusks ever, buffalos and hippos all year round. Crater is a very important hide and habitat for endangered species of wildlife. It is one of the few places with a higher population density of black rhinos in the world.
