Cappadocia Paragliding

A Cappadocia Paragliding tour has started its activities in the field of tourism, and is offered to your service. This is a new activity which came alive for our guests who come to this wonderful region. All guests staying in Çavuşin, Acıgöl, Avanos, Derinkuyu, Gülşehir, Hacıbektaş, Kozaklı, Goreme, Ortahisar, Urgup will be able to benefit from the service of paragliding in Cappadocia.

For Cappadocia Paragliding, we have transfer service with our vehicles, from the region or your hotel to our office in Urgup or directly to our flight area. When you make it up to the mountain and a brief briefing we start preparations. After you get to the top, you leave yourselves in the magnificent Cappadocia landscape with our pilots. You see the fairy chimneys from above and enjoy the freedom by feeling the wind in the historical region. In order to realize all these, you need to make reservation or contact our sales offices. Cappadocia Paragliding service starts at 8 am in the morning until sunset. You can enjoy it at any time.

What is tandem Cappadocia Paragliding?

First of all, let us inform our guests about paragliding in Cappadocia about Tandem flight.
Tandem flights are made with 2 people and the referral is always a professional pilot.
It consists of a 42 m2 parachute. When the flight occurs, the pilot and the passenger are connected to each other by a system called scales.
With the wind coming, the tandem pilot lifts the wing and fills it with air for parachuting, then makes it ready for flight.
Afterwards, all you need to do is take a few steps and take off from the slope.
There is no need for the passenger to receive any training in order to do all this.
Tandem means flight together with passengers and our Certified Pilots.
In other words, paragliding will be done with 2 people. When we reach the top, pilot selection is done according to your weight.
You will complete your flight preparation with our experienced and Certified Pilots. Then a flight full of adrenaline will be waiting for you.
