Customized Travel Portal Solutions for Travel Agents and Tour Operators

- FlightsLogic, a leading Travel Portal Development Company has expertise in designing Travel Portal Solutions that are fully tailored to meet the needs of travel agents. Its features include user modules such as B2C, B2B, corporate, white-label, and services modules such as flights, hotels, transfers, sightseeing, and vacation packages.

- Our Experienced Travel Professionals offer the best Travel Portal Solution with comprehensive travel portal development costs, Third-Party Integration, GDS, Hotel and Airline Reservation systems, and development for travel agencies, online agencies, tour operators, or destination management companies.

- We connect Amadeus GDS, Sabre GDS, Galileo GDS, Travelport UAPI, Abacus, Worldspan, Mystify, and Travel fusion for flights and hotels. We have integrated over 100+ hotel Aggregators, Cars, Cruises, Hostels, Transfers, Sightseeing, Transfers, Travel Insurance, and other services utilizing modern technology integration approaches.

- FlightsLogic specializes in portal design, development, and integration of several GDS's XML, API, testing and deployment to client host, and product maintenance for 24/7 technical and customer support services.

- With our advanced travel-specific services like website development and mobile app development services, you can fully automate the booking processes, sell products and services, and establish better business cooperation with your partners to enhance your travel business. We aim to create high-quality, eye-catching, responsive, and user-friendly bespoke travel websites that integrate with cutting-edge technology.

- Our highly designed B2C and B2B travel website application development, XML API integration, and GDS integration solutions may assist travel and tourism organizations. We provide the most reasonable costs on all types of B2B and B2C transactions.

- As a leading travel technology company, we provide best-in-class portal development services to help your customers with car rental, travel packages, and online payment. Our travel developers have a solid understanding of the core fundamentals of website development and can match your specific requirements.

How Travel Portal Development Services Are Empowering Travel Businesses?

- A travel portal is a platform that allows travelers to quickly arrange their whole vacation, including booking flights, reserving hotels, renting a vehicle, and dealing with visa and insurance issues.

- Whether you are aggregating airline or hotel inventory, having an online booking platform simplifies and streamlines the booking process through automation and other features. This online booking portal helps customers filter search results and reserve the services they need. Travel portal solution services include travel API integration, which enables the travel industry to aggregate real-time information from airline and hotel inventories.

- They assist online travel agencies and tour operators in achieving operational excellence and increasing productivity.

- A Travel Portal Development is the key to achieving an online presence and increased traffic to your website, which results in increased ROI. It is advantageous to both the party's travel business and the end consumer.

Travel Portal Solutions: What We Offer

Flight Booking System

- Flight Booking System combines all flight-related searches to find the most desirable alternatives for travelers and then generates the PNR through online booking.

- Flight API is incorporated to obtain real-time results and book directly online. Our flight ticketing system is linked to the GDS and significant LCCs and full-service domestic airlines, where data is collected and displayed.

- Customers will search the segments, choose the appropriate choice from the results, and then generate PNR after paying via Payment Gateway.

- Flight Booking System allows you to search, book, and confirm flights with a single API integration. It also aids in the generation of Booking and Cancellation Reports.

- Easy to book tickets
- Saves time and money
- Provides all information about a flight
- 24/7 customer support through chat and calls
- Mobile Availability
- Send automated tickets to the customer by mail
- Easy Refund Policies
- Available for both Domestic and International Airlines
- Easy round trip and one-way search option
- Instant flight reservation
- On-demand feature up-gradation
- Making modifications and flight cancellations

Flightslogic
Transforming Travel Technology

Hotel Booking System

Hotel Booking System is a one-stop solution that uses content from multiple suppliers to satisfy your customers' particular needs. With Hotel API Integration, your customers have access to a broader selection of hotels and real-time availability and confirmation.

- Responsive design compatible with all browsers and devices
- Connected with Hotel Extranet to manage own contracts
- Real-time availability from XML suppliers
- Multiple room options from different suppliers
- Filtration based on star rating, price range, name sorting, location, etc
- Grids, list & map views results
- Own Contracts management system to manage hotel contracts on all sales channels like B2C, and B2B for bookings
- Multiple offers, Supplement, allocation, season rates, blackout, etc., in an extranet
- Manage Bookings - Amendments & Cancellation

Car Booking System

FlightsLogic provides a customizable car booking system for rental car companies and car rental agencies. Managing reservations is quite easy by using the car booking engine, tracking the availability of different vehicles, maintaining vehicles in and out, etc. We have worked with several companies providing rental cars and have many clients across the globe.

- Real-Time Availability of Vehicles
- Booking Details
- Advanced Booking Report
- Advanced Search Option
- Car rental System
- Rental Agreements
- Fleet Management
- Web planning
- Accounting (Billing, Invoice) Functions

Holiday Package Management System

FlightsLogic provides advanced holiday packaging software for tour operators that helps you to create a package, manage inventory, group travel, manage customers and travel agents, fully automate your sales process, improve your services ordering, manage accounts, and gain full insights into your travel business.

- Manage your agent list and get verified customers.
- Easy to manage bookings, markup, and discounts.
- Very high customer satisfaction with the easy-to-use reservation system.
- Using this online booking system can significantly increase property occupancy rates.
- The online reservation system includes a comprehensive admin control panel that makes booking management easier and less time-consuming.
- Manage your online bookings from the office, home, or even when away on holiday.
- Daily backups of booking system data ensure your data is safe and secure.

B2C Module

- B2C Travel Portal Solution provides clients with self-service capabilities that allow them to make online bookings and generate their own booking vouchers. By logging in to the Customer Dashboard, B2C End Users may view their reservations and payments history and send a cancellation request at any time and from any location.
- B2C Travel Portal enables your registered visitors and clients to book directly without the involvement of tour providers.

B2B Module

- FlightsLogic provides a technically strong and reliable B2B Travel Portal Solution so you and your sub-agent can grow your business. Customers and travel agents are linked through the B2B Travel Portal Solution
- Our B2B Travel Portal gives you complete control over creating agents and their logins, increasing and decreasing credit limits/balances, activating or deactivating agents, tracking bookings/commissions/sales, and altering mark-ups/discounts. B2B Travels Portals provides complete travel services such as flight, hotel, bus, and car booking.

Admin Module

- The Admin Module is a management tool that allows you to monitor and control your Travel Portal. You may access your flight, hotel, bus, and vehicle bookings/cancellations in the Admin Module.
- Agent Management, Customer Management, B2C / B2B Modules Management, Coupon Management, Payment Setting, Site Setting, Staff Management, Account Management, and so on are all available in the Admin Module. You may follow your user by checking search logs from reports.

API Integration

- FlightsLogic offers APIs for flights, hotels, buses, and cars. We've worked with various clients and created the best portals utilizing our Flight API, Hotel API, Bus API, and Car API. Our API is simple to use and integrates with existing and new systems.
- Our API delivers low-cost inventory from numerous vendors, allowing you to create and manage your own bespoke Travel Portal. We can assist you in analysing your requirements and providing the best solution based on our experience with technological solutions.
