20 – Unlimited

Activity Overview

- Using detailed plans and a ‘flat pack’ kit of materials, teams race against time to construct their car
- All teams are deliberately provided with separate plans to construct their Formula 1 car
- Continual communication is required to ensure matching alignment of each car component!
- Once complete they decorate, brand it and formulate a race strategy
- After fine tuning their ‘Pit-Stop’ routine teams line to race in relay heats
- The team with the first racing car over the line is declared the winner!
